

BELUGA Subsea

RUD ROV HOOK

The RUD ROV-Hook is time-efficient in relations of attachment and detachment. The safety latch automatically closes when the ROV releases the triggers. The hook can be operated by traditional ROV manipulators.

Technical specifications

 **WLL**
10.5T / 25T

 **OPERATING DEPTH**
Down to 6000 MSW

 **WEIGHT**
14 / 26 kg

 **MATERIAL**
Steel

Key benefits

- Top Eye designed for integration against shackle
- Slim & ROV friendly design.
- Corrosion-resistant materials.
- Delivered with certification

Key features

- Lightweight: Easy to handle and transport.
- Corrosion-Resistant: Reliable in harsh subsea environments.
- Easy Integration: Works in various offshore lifting applications.
- Safety Features: Snag-free design.
- Proven Design: Tested for durability and performance.
