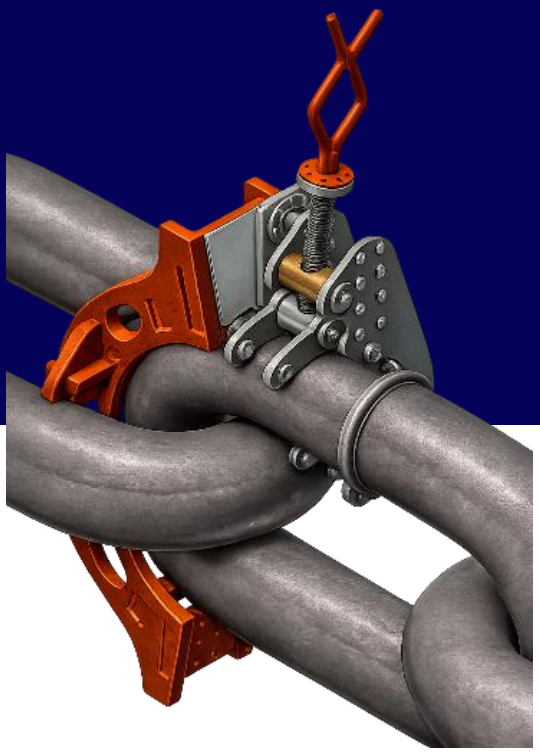
BELUGA SUBSEA

BELUGA Target Link Stopper

TLS

The Beluga Target Link Stopper (TLS) is a robust and compact subsea solution designed to prevent overpull during mooring line tensioning operations



Designed and manufactured by Beluga Subsea AS, the Target link Stopper (TLS) provides a reliable physical barrier during tensioning and installation of mooring chains. The compact and ROV-friendly design ensures efficient installation, safe operation, and compatibility with offshore chain handling system.

Technical specifications

Weight Dry:
52 kg

Weight in Water:
45.5 kg

Dimensions:
1163x455x334mm

MATERIAL
Carbon Steel/316L

Application
Mooring Chain Tensioning

Key benefits & Features

- Compact and lightweight design
- ROV friendly operation
- Design to prevent overpull
- Robust offshore/subsea construction
- Clamp functionality for secure installation
- Suitable for offshore mooring operations
- Easy installation and handling
- Proven Design: Tested for durability and performance.
